# Is Your Website a Digital Hub?

The role of the SMB website is shifting away from being a “digital storefront” to serving as a dynamic hub for your business’ marketing and identity across the web.

- Consider this:
  - What will visitors find when they reach your website?
  - How does your website turn visitors into customers?
  - What can visitors do through your website?

**Your  
Customers are  
Looking for  
Information.**

**Are You Giving  
It to Them?**

**Half of potential sales are lost because consumers can't find the information they're looking for.**

**92% of consumers who used a mobile device to research a product or service made a purchase within a day.**

**39% of consumers prefer to use websites to research products prior to purchase.**

# Keywords

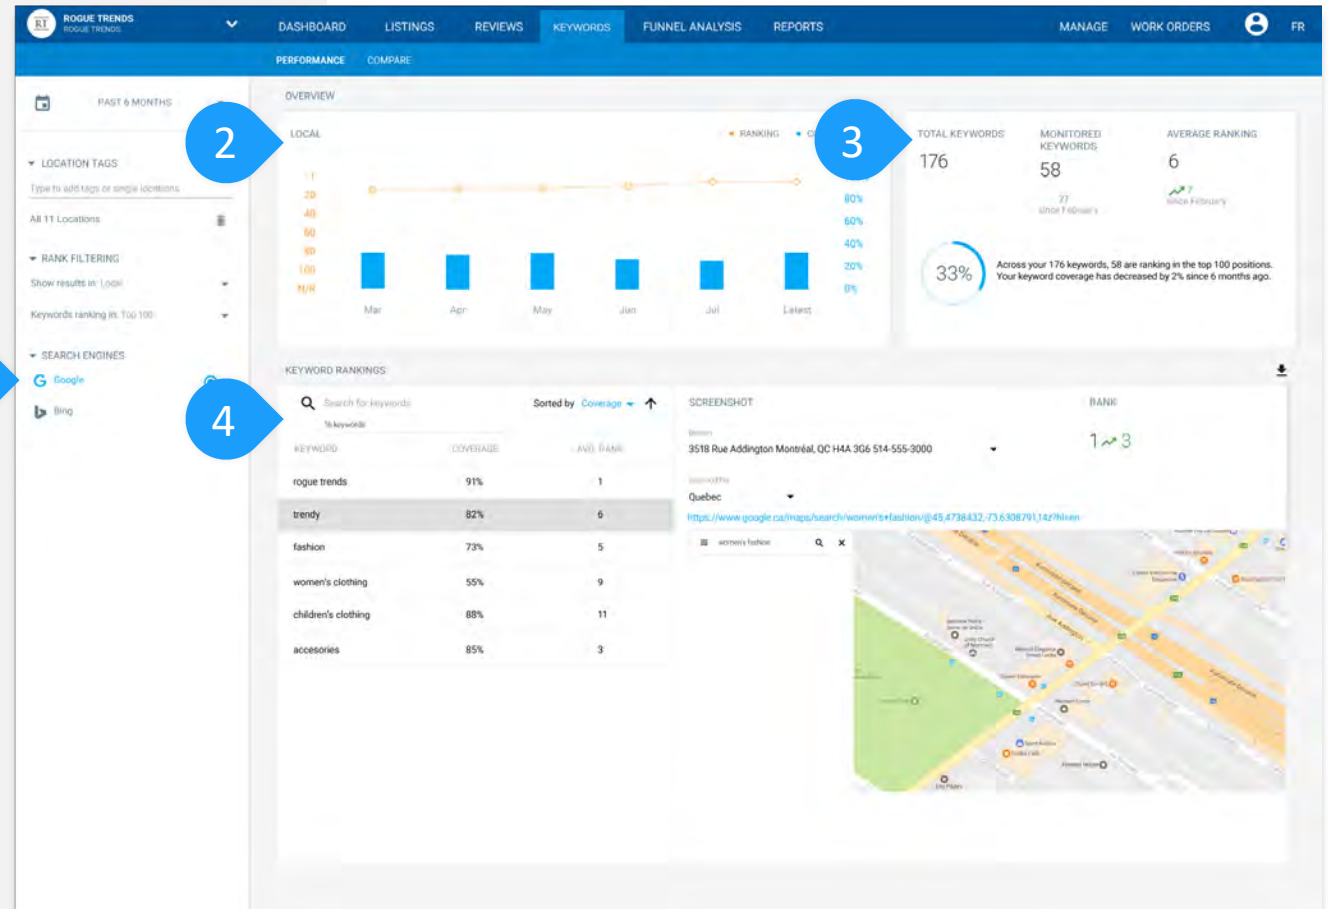

One of the major benefits to a properly executed local campaign is a sharp increase in your local keyword ranking.

Your listings should be optimized for critical keywords that your potential customers are using in their searches. Use the hub to measure your performance.

# Keywords: Performance

Keyword Tracking allows you to measure your performance on both organic and local search results.

- 1 Toggle through the directories to view performance directory by directory.
- 2 Evaluate your progress over time.
- 3 At-a-glance metrics for your Keyword performance.
- 4 Organic and Local ranking for each Keyword.

# Keywords: Compare

- 1 Compare keyword performance by location on the most important search engines: Google and Bing.
- 2 Sort by location, keyword and geo-modifier to have a clearer picture of how you are ranking on SERPs.

# What's SEO all about?

Here are some of the factors search engines consider when determining search results for a query:

- Relevant titles and descriptions on website pages
- Mobile friendly website
- Page load speed
- Business info consistent across directories
- Updated Google My Business listing\*
- Product, service, and geographic keywords
- NAP (name, address, phone) on website
- Quality links to your website from external sources

# The Influence of Local Search

97% of people **learn more** about a local company **online** than anywhere else.<sup>1</sup>

78% of local-mobile searches **result in offline purchases**.<sup>2</sup>

50% of mobile searchers looking for a local business **will visit the store within one day**.<sup>3</sup>

# Local Search Success: More Than Rank\*

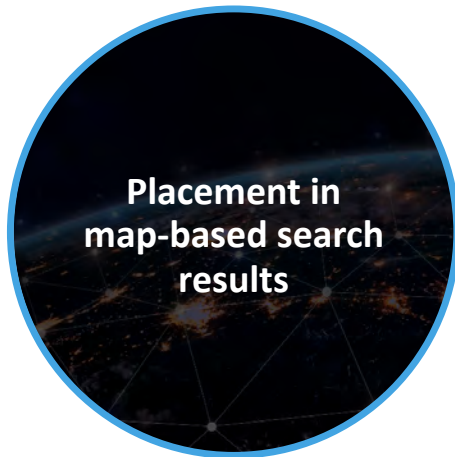

- What *does* SEO influence?

Better visibility for  
your top business  
keywords

Better search  
advertising  
performance

Placement in  
map-based search

# •SEO vs. •Search Advertising

## Search Engine Optimization (SEO)

- Shows website links in organic and local (Map) search results
- Ideal for research and proximity- based search queries
- Builds web presence & drives local traffic to your business
- Creates long-term website authority
- Continues to positively impact your business over time

## Search Advertising

- Shows ads in paid search results
- Ideal for ready-to-buy search queries
- Drives calls and leads from locally-targeted prospects
- Generates immediate response
- No additional impact to business after you stop paying for ads

# Search Advertising & SEO:

- Better together

Incremental lift in clicks  
when both paid and  
organic links appear on  
the first page  
of search results.<sup>1</sup>

# GAWDA Media Geo-Fencing and Re-Targeting

The most precise address-level  
geo-targeting solution used to build  
an audience based on plat line data  
for physical addresses

# GEO-FENCING

A feature in a software program that uses the global positioning system, or the GPS, of a mobile device to define geographical boundaries.

A tactic that can be used to put targeted display ads in front of users based on a very specific geographical boundary or boundaries.

# WHAT IS ADDRESSABLE GEO-FENCING?

Addressable Geo-Fencing brings to advertisers a powerful, efficient, and accurate new way to target specific individuals and businesses with digital advertising.

Addressable Geo-Fencing can be used both as a stand-alone tactic and to improve the results of direct mail campaigns, and other marketing that target specific businesses, like IP targeting.

By extending the reach, improving the frequency, and providing foot traffic attribution, Addressable Geo-Fencing makes all targeting efforts more effective.

To use Addressable Geo-Fencing, a list of USPS addresses is provided by you and uploaded into our system and we will traffic the campaign.

Those street addresses are then be automatically converted into geo-fences that conform to the plat lines of each address. Then, devices seen within those plat lines are targeted.

## The Evolution of Localized Targeting

# Addressable Geo-fencing

Powerful, efficient, and accurate way to target specific households and businesses with digital advertising.

## Digital Display or OTT/CTV Video

Whether digital display or non-skippable, immersive videos content, engage with your best potential audience.

## Highly Precise

Target a list of physical addresses or a curated audience specific to your needs. Our technology uses plat line data from property tax and surveying information to maximize precision of addresses.

## Lead Attribution

Conversion Zones can be used to track uplift in foot traffic to the advertiser's location or combine with targeted email and matchback reporting to track ROI.

# HOW IT WORKS

Physical USPS addresses which an advertiser wants to target are uploaded into the AdServer by Central Ad Ops

---

The addresses are then matched against plat line data to collect the exact physical location, size and shape of the individually matched addresses.

---

The system then geo-fences each matched address to collect and target users specific only to that distinct address location.

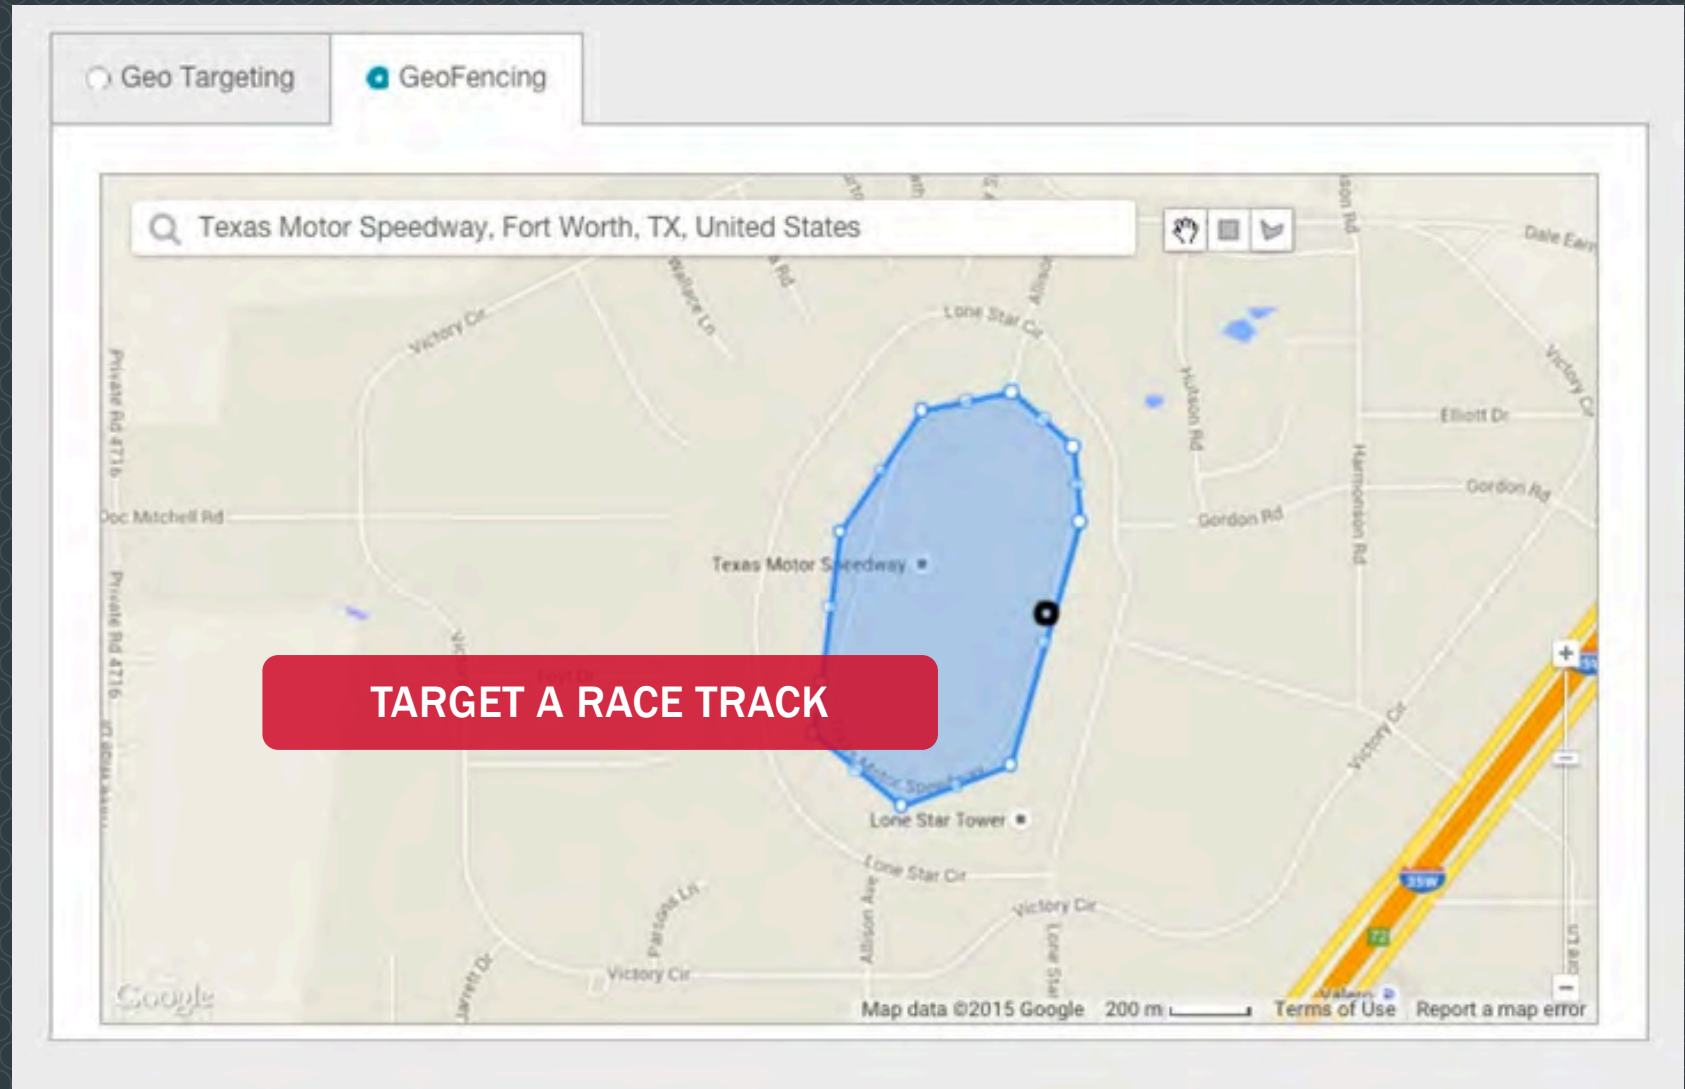

---

Audiences at every single address are updated on a daily basis.

## EXAMPLE USE CASE: NASCAR FANS

Target users attending  
a NASCAR event, or  
other local race tracks.

# Retargeting

Maximize your marketing. Retargeted viewers are 70% more likely to convert than the average online adult.

## Search Retargeting

Put your message in front of consumers as they are actively browsing the internet for your services.

## Site or Social Retargeting

Convert your website visitors after they have bounced off your site by following them as they browse the USA Today Network and/or Facebook.

## Email Retargeting

Combined with our targeted email solution, retarget individuals who opened your email.

Visitors will leave a website without converting.
